Welcome to the On Running Middle East

SUPER SPRINT - TWO MONTH TRAINING PROGRAMME!

Here you’ll find an exclusive triathlon specific On Running ME guide that will take you on to the blue carpet at the ITU World Triathlon Abu Dhabi presented by Daman 2020.

When training for anything, anything at all, even life itself, the way you get better is by stepping outside your comfort zone. Not only that but doing it in a multiple of different ways! You’ll find your Super Sprint training programme below to use as a guide when building up towards the ITU World Triathlon Abu Dhabi.

Each week includes 3 different runs which all have very different purposes. These are meant to keep your body guessing, therefore stressing the system and therefore making you faster!

Run 1 – Easy Run

This run is meant to be an active recovery. Focus on staying relaxed, maintain proper form, and enjoy the run!

Run 2 – Long Run

The idea here is to prepare your body for the run duration of your triathlon race. As you can see, you’ll be running longer than the actual race is, which will make your race day effort seem much more manageable.

Run 3 – Speed Session

A key component of getting faster is by doing interval training, where the pace of your running varies. You’ll notice your heart rate increasing significantly during the “fast” portion of the run and slowly decreasing during the walk or jog phase. Don’t forget the heart is a muscle too and this is a great way to train it!
## Super Sprint

375m swim | 10km cycle | 2.5km run
